	Date Received		Answer Prepared by	Change No.	Government Response
RFI-0002	03/10/2017 03/13/2017		Eric Reitter	N/A N/A	INFORMATION REQUESTED: Building Information Modeling - We expect to use BIM to develop the building rendering required by the RFP. However, we are unclear as to the extent of BIM Model requirements and the scope of items that should be included in the BIM. Please clarify the government's intent for the use of BIM as it does not appear that BIM is applicable to most scopes of work on the project.
RFI-0005	03/10/2017 03/13/2017		David Bean	N/A N/A	INFORMATION REQUESTED: Groundwater Flow Model - We are preparing to update/re-calibrate the Groundwater Flow Model and are interested in knowing what data is available from 2012 to present for the Bunker Hill area. Please provide the following daily or monthly data since 2012 (or earlier), if available: - Stream flow by stream-reach - Stream stage by stream-reach - Surface water elevations, especially at or near the outfall structure/dissipater - Stream diversions (if any) - Groundwater elevations in monitoring wells - Monitoring well construction details/boring logs - Precipitation data - Run-on and run-off to/from streams - Perc basin recharge (if any) - Groundwater pumping (if any) - Groundwater quality - All historical data sets (stream flow, groundwater elevations, hydraulic conductivity, etc.) used to compile the MicroFEM model.
